IMMACULATE DESIGN

dishwashers by

Porter & Charles

QUIET, INTELLIGENT, EFFICIENT AND ATTRACTIVE.

Designed and built in Europe, Porter & Charles dishwashers are specifically made to accommodate the demands of the busy North American lifestyle. German engineering ensures that performance expectations are constantly exceeded. Porter & Charles provides a thorough cleaning every time – whether you're washing up after a holiday meal, or cleaning your favourite stemware after an intimate cocktail party. And, these sparkling results are achieved in an energy efficient manner, using a minimal amount of water and electricity.

THE PORTER & CHARLES PHILOSOPHY IS SIMPLE:

There is no need to compromise. Available in two versions of timelessly stylish stainless steel, or fully integrated to blend in with your cabinetry, these dishwashers enhance the appeal of any kitchen. Operating at a barely audible noise level, your dishes are perfectly cleaned, leaving you more time for the things you enjoy.

○
A GREENER CLEAN

PORTER & CHARLES RECOGNIZES THAT
THE GREENER CHOICE IS THE SMARTER CHOICE.

Porter & Charles dishwashers are designed to meet or exceed energy efficiency standards in Europe and North America. EnergyStar® rated Porter & Charles dishwashers consume ultra-low amounts of water.

Porter & Charles also complies with the RoHS standards developed in Europe (**R**eduction **o**f the use of Certain **H**azardous **S**ubstances) eliminating lead, mercury, cadmium and other harmful agents from its products and from its manufacturing process.

Porter & Charles dishwashers also employ condensation drying, the more energy efficient option. The best part? This green approach has been engineered so that your dishwashing results are in no way compromised. Superior cleaning from a machine that conserves energy and the environment?

Yes, you can have it all.

QUIET

Porter & Charles dishwashers are so quiet that you'll barely notice when they are running. Three layers of insulation muffle sound from inside the machine, creating a near silence. Four-program dishwashers operate at a barely audible noise level of about 54dB, and the six-program models at an even lower 50dB.

Inside each unit is a stainless steel tank, constructed of the finest materials available. Using this high standard of steel extends the life of your dishwasher by protecting it from heat and corrosion. The stainless steel interior also provides a superior clean for your dishes, glassware & cutlery, and is more sanitary than plastic interiors commonly found in other brands. With wash temperatures reaching 164°F or 73°C, the six-program models even meet the strict standards for sanitization set out for applications in the hospitality industry, such as Bed & Breakfasts.

EFFICIENT

The primary purpose of Porter & Charles dishwashers is to clean your dishes. This is something they do exceptionally well. Every aspect of dishwashing is taken into account to ensure the best results every time.

Water is directed at dirty dishes from five separate sources: double-sided spray arms in the top and middle of the machine, and a showerhead spray from the top, reaching into every corner of every dish, leaving nothing behind.

Porter & Charles dishwashers' in-line water heating system provides correct water temperatures to ensure perfect washing results with optimum energy efficiency. The concealed heater is also safer than traditional exposed heaters.

Before it reaches your dishes, the water is first treated through a 3-Way Euro-Filtering system, removing the smallest dirt particles, ensuring clean water and optimum circulation.

EASY INSTALLATION

Porter & Charles dishwashers have unique features that simplify installation. Rear feet can be adjusted from the front of the unit. Fully integrated models feature an adjustable front hinge system that balances the door by adjusting to the weights of your cabinet door.

INTELLIGENT

Easy to read electronic controls allow you to select your wash program with one touch and the integral memory automatically defaults to the last program used. The dishwasher goes to work, only using the water and energy required to thoroughly clean any variation of dishes.

RINSE & HOLD

An ideal option for occasions when dishes must be left dirty in the machine for a period of time before running a full load.

REGULAR WASH

The best choice for day-to-day dishwashing.

QUICK WASH

This 30 minute program is ideal for lightly used dishes.

POTS & PANS

Higher temperatures and increased water pressure scour off baked on food.

CHINA/CRYSTAL

Fine dishes and glassware are cleaned using a lower temperature and lighter water pressure to protect delicate items.

POTS & PANS PLUS

Exceptionally dirty dishes get extra attention.

Flooding is not a concern with the Porter & Charles line of dishwashers. A float system and bottom reservoir eliminates kitchen catastrophes, and provides you with peace of mind.

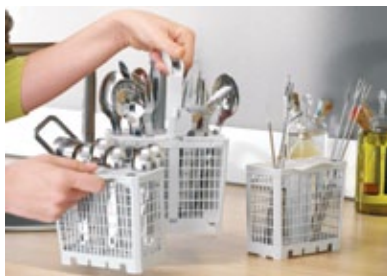

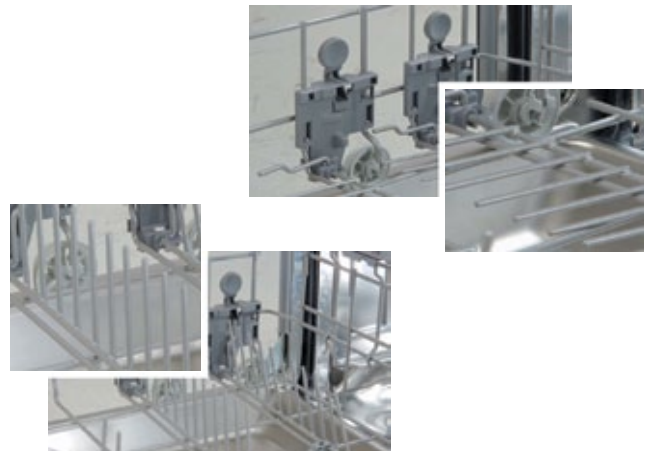

FREEDOM

& FLEXIBILITY

Porter & Charles eliminates the risk of melting plastic dishware with its concealed heater, providing the freedom to wash plastic storage containers in the top or bottom rack of your dishwasher.

The six-program models boast additional versatility, including height adjustable upper racks and flip-down shelves allowing you to reconfigure your dishwasher's storage capacity to suit each job. Large pots and pans fit with ease, reducing the time you spend at the kitchen sink. One load can harmoniously accommodate your glassware, plates, pots and utensils.

The divisible cutlery basket (only available in six-program models) provides further flexibility, allowing you to make use of the extra space when the full cutlery capacity is not required.

DISHWASHER MODELS

DWPC4FC – STAINLESS STEEL WITH FRONT PANEL

A reliable assistant in the kitchen, this stainless steel model features front panel controls.

- 5 level wash
- 4 programs
- 4 wash temperatures
- Program follow-up
- Green LED lighted display
- 12 place setting capacity
- Cutlery basket with removable support
- Adjustable upper rack
- 3 way euro filtering system
- Stainless steel tank
- ENERGYSTAR® rated

DWPC6SS – STAINLESS STEEL WITH HANDLE

A sleek and stylish option, the controls on this stainless steel model are cleverly concealed on the top of the dishwasher door. The hidden green LED touch controls provide a clean look, and prevent children from playing with the controls.

- 5 level wash
- Digital display
- 6 programs
- 5 wash temperatures
- 1 to 24 hour time delay
- Electronic rinse-aid indicator
- 12 place setting capacity
- Adjustable upper rack (loaded or unloaded)
- Foldable plate supports
- 3 way split cutlery basket
- Lower rack long tool shelf
- End of cycle chime
- 3 way euro filtering system
- Stainless steel tank
- ENERGYSTAR® rated
- Sleek handle matches design features of Porter & Charles ovens

DWTPC6F1 – FULLY INTEGRATED

Blending with your existing cabinetry, this fully integrated model can be customized for any kitchen. Green LED lit controls are found on the top of the door.

- 5 level wash
- Digital display
- 6 programs
- 5 wash temperatures
- 1 to 24 hour time delay
- Electronic rinse-aid indicator
- 12 place setting capacity
- Adjustable upper rack (loaded or unloaded)
- Foldable plate supports
- 3 way split cutlery basket
- Lower rack long tool shelf
- End of cycle chime
- 3 way euro filtering system
- Tall tub, stainless steel tank
- ENERGYSTAR® rated
- Customizable door to match any décor (maximum weight on door incl. handle is 5.5 kg or 12 lbs.)
