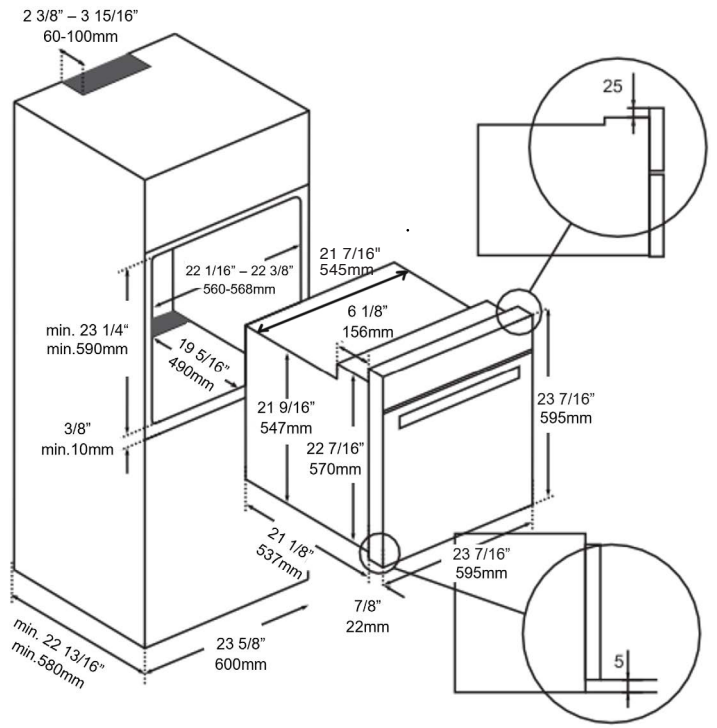
$23^{7/16"}$ / $23^{7/16"}$ / $21^{1/8"}$

595mm / 595mm / 537mm

CUT-OUT DIMENSIONS W / H /D (INCH/MM)

min. $22^{1/16"}$ / $23^{1/4"}$ / min. $22^{13/16"}$

min. 560mm / 590mm / min. 580mm



IMPORTANT

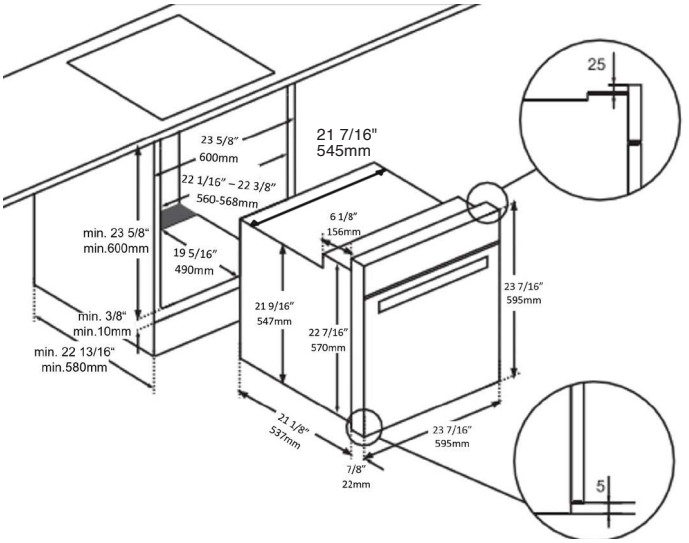
- P&C Ovens are supplied with a 5ft long electrical cable and must be hardwired.
- P&C Ovens operate using the following wires: **RED** & **BLACK**, Live Wires **GREEN**: Ground The Neutral (White) wire is not required for the electrical install.

*VOID CUT OUT

- If the oven is mounted in a tall or semi-tall cabinet, there must be a minimum gap of 1 9/16" (4cm) cut out of the shelf and behind the upper cabinet to allow air to flow freely.
- A void must be cut out in the shelf of the cabinet. Leave 4" of shelf material around the void.
- Additional support must be added to the shelf with the void. The support must be able to withstand the oven weight.
- If insufficient airflow is not provided, the life span of the appliance will be shortened.
- Cut out in the toe kick is required for adequate airflow.
- Bottom vent grill (7427640) available.

FALSE BACKS

- Install false backs for storage spaces. This will prevent contents from falling through the vent space. In addition, warm air will not interfere with store contents.



RECOMMENDED UNDER COUNTER DIMENSIONS

Airflow Requirements

- If the oven is being placed under the counter, there must be a minimum gap of 1 9/16" (4cm) cut out of the shelf behind the oven to allow air to flow freely.
- A void must be cut out in the shelf of the cabinet. Leave 4" of shelf material around the void.
- Additional support must be added to the shelf with the void. The support must be able to withstand the oven weight.
- If insufficient airflow is provided, the life span of the appliance will be shortened.
- Cut out in the toe kick is required for adequate airflow
- Optional bottom vent grill (7427640) available model.
